

Commercial Drone Solutions for Construction Sites, Mines, and Quarries

End-to-End Drone Solutions

Airware provides end-to-end drone data solutions for enterprises to optimize productivity, ensure site safety and compliance, and improve collaboration across all sites.

Customers now get the combined power of an enterprise-focused workflow, with powerful industry-specific data analytics to help turn aerial data into business decisions.

Plan

Cloud-based enterprise software for planning and managing operations

Fly

Easy-to-use operator software compatible with industry-leading multi-rotor and fixed-wing drones

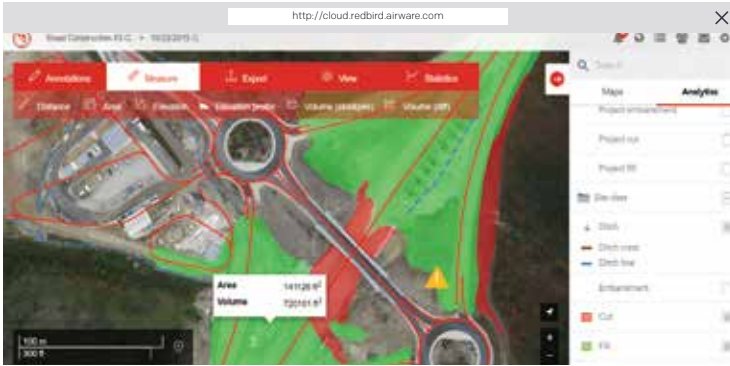

Analyze

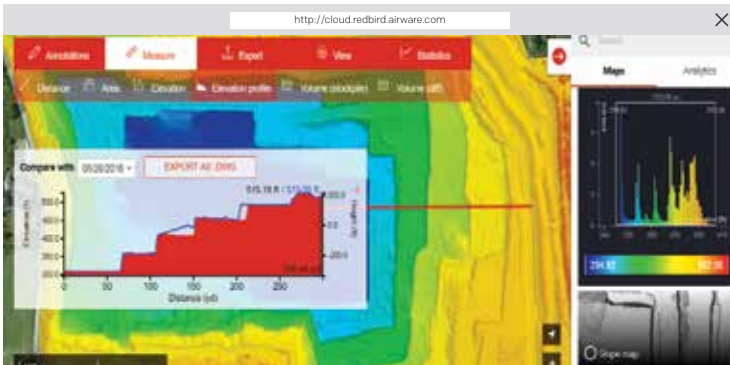

Powerful tools and industry-specific modules for analysis and reporting for mining, aggregates, and construction

- Get a complete and accurate view of each of your sites and greater visibility across all of your sites, anytime, anywhere.
- More accurately report on production and track and compare progress over time.
- Optimize efficiencies for both processes and machinery, including fuel consumption.
- Help ensure compliance with regulations and safety rules.
- Scale with the pace of your business - across multiple sites, teams, and geographies.

Digitize and Optimize Your Site

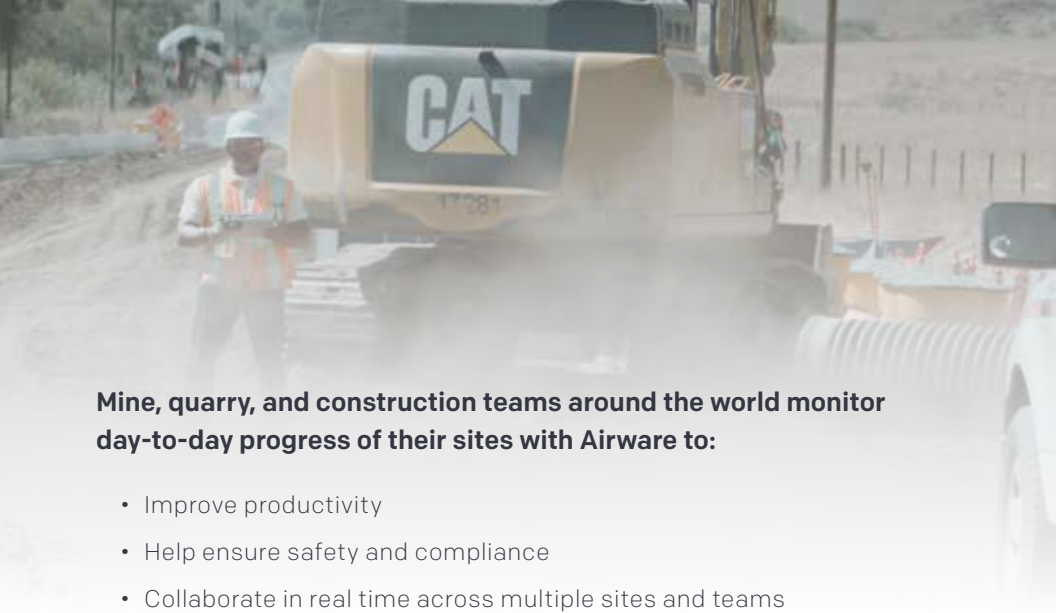

Get a global overview, instantly

Track progress over time, online

Take accurate measurements

Mine, quarry, and construction teams around the world monitor day-to-day progress of their sites with Airware to:

- Improve productivity
- Help ensure safety and compliance
- Collaborate in real time across multiple sites and teams

In Their Words

“Before working with Airware, we needed about five days to survey our sites. Today, once the drone has flown over our quarries, I’ll get the production data the next morning.”

Vincent Amossé, Deputy CEO, CB Group

“It’s the ultimate solution in terms of quality and efficiency. It’s fast, accurate and safe. Drones are the future. We won’t go backwards.”

Romain Delhaye, Head of Operations, A2C

U.S. Headquarters

343 Sansome Street, Suite 600
San Francisco, CA 94104, USA

European Headquarters

130, rue de Lourmel — 75015 Paris, France

THE NEW DRONE-POWERED DIGITAL SITE

Boost Site Productivity and Monitor Safety and Compliance for All Your Sites

Drilling and Blasting

Plan blasting operations, import blasting files

Measure volumes to extract and volumes extracted

Accounting

Reconcile stockpile volumes with regular stockpile valuation

Production

Track and plan production: take accurate measurements of extracted and filled volumes

Optimize haul roads: monitor machine data and productivity

Safety

Maintain compliance: analyze safety berms and blocks, high wall heights

Management

Monitor all your sites

Get detailed analytics

Plan jobs and dispatch to operators

Environment

Monitor environmental impact and communicate with local authorities

TAKE YOUR MINING, QUARRYING, AND CONSTRUCTION OPERATIONS TO THE NEXT LEVEL
